

G Suites best kept secrets

There is a lot to learn about G Suite, and some of its best features may be hard to find. In this webinar, we will learn the best tips, tricks and secret apps of G Suite for Education, and use them in ways to better motivate, engage and empower our students.

Using Big Data with Google

These days, it is all about the data. Imagine what tomorrow will look like? In the future, it is going to be important that students know how to work with data. In this webinar, learn how to find data using Google's lesser known search engines. We will also explore ways to teach students how to interpret the data by using Google Sheets and Forms.

Advanced Forms and Sheets

Forms and sheets are great for more than just collecting data. In this webinar we will learn to use Forms and Sheets in new and unique ways that can help any teacher motivate and engage students in their classrooms.

Advanced Slides and Drawings

Slides and Drawing are two of the most useful products in the G Suite. In this webinar, we will learn to use Slides and Drawings as creation and publishing tools in exciting ways that help engage and motivate students.

Screencasting with G Suite

Blended Learning is a tool every teacher should have in their tool box. In this webinar, we will learn the easiest ways to make screencasts, how to edit and post them to YouTube, and how to deliver them to students in ways that makes them responsible and accountable to watching the videos.
